Subject: Application for Entry-Level Role in Cloud Computing / Python Web Development

Dear Hiring Manager,

I am writing to express my interest in an entry-level position in AWS Cloud Computing, SQL, or Python Web Development at your esteemed organization. As a recent Electronics & Telecommunication Engineering graduate and an AWS Certified Cloud Practitioner, I am excited to launch my career in cloud technologies and backend development.

Over the course of my four-year degree at Sinhgad Institute of Technology, I was actively involved in multiple technical projects, workshops, and team-led initiatives. These experiences not only sharpened my technical skills in programming, database management, and networking, but also helped me develop strong leadership and collaboration abilities. I led a team of four in designing a .NET-based "Talent Connect Recruitment Portal", where I coordinated project planning, delegated tasks, and ensured timely delivery — mirroring the dynamics of real-world development environments.

My training in Python full-stack development and SQL has enabled me to build efficient, secure backend systems and interact with relational databases. Additionally, coursework and certifications in cloud computing with AWS have given me a solid grounding in cloud-native architecture, REST APIs, and scalable system design.

Beyond technical competence, I bring a proactive mindset, effective communication skills, and a strong drive to learn and grow. I'm confident in my ability to adapt quickly to new challenges and contribute positively to team success.

Thank you for considering my application. I would be grateful for the opportunity to contribute to your organization and grow within a dynamic, forward-thinking team. I look forward to the possibility of discussing how I can support your goals.

Sincerely,  
Shreyash C. Bhandarwar
